

Christmas VR Greetings - Pilot for Care Homes

Short, calm 180 and 360 messages recorded with residents. Best in a lightweight VR headset, so it feels like being there together. USB and private link are included.

What is immersive 180 and 360 video?

360 surrounds the viewer. You can turn your head to look around, as if you are inside the scene. 180 plays naturally in front of you. Both can be viewed on a phone or laptop, but the strongest effect is in a headset.

Why it helps at Christmas

Families feel close	A shared moment that brings people together during the holidays.
Keepsake with meaning	Words, thanks and stories saved for years to come.
Dignity and confidence	Residents are heard in a calm, respectful way; staff facilitate something positive.
Safe and simple	Clear consent, short sessions, private delivery and a safe 3-month backup.

Complimentary pilot - up to 3 residents

Families receive a private link and a USB. We keep a safe 3-month backup. Delivery is private by default. Because this is a pilot, we ask permission to use a very short, anonymised clip in our portfolio. Consent can be withdrawn at any time by email.

Not only Christmas

If a resident wishes to record a different message for family, we can do that too. A few words, a smile, a song or a story are all welcome.

How it works

1) Scheduling by email 2) Choose up to 3 residents with staff 3) Calm 15-30 min recording 4) Private review 5) USB and link delivered.
